

Diocese of Greensburg Curriculum
Science Grade 3

Unit	Standards	Content	Skills
<p>Weather and Climate (Earth Science)</p>	<p>CCSS: ELA & Literacy in History/Social Studies, Science, & Technical Subjects K-5 CCSS: Grade 3</p> <hr/> <p>Reading: Informational Text Key Ideas and Details 1. Read closely to determine what the text says explicitly and to make logical inferences from it; cite specific textual evidence when writing or speaking to support conclusions drawn from the text.</p> <p>RI.3.1. Ask and answer questions to demonstrate understanding of a text, referring explicitly to the text as the basis for the answers.</p> <p>2. Determine central ideas or themes of a text and analyze their development; summarize the key supporting details and ideas.</p> <p>RI.3.2. Determine the main idea of a text; recount the key details and explain how they support the main idea.</p> <p>3. Analyze how and why individuals, events, and ideas develop and interact over the course of a text.</p> <p>RI.3.3. Describe the relationship between a series of historical events, scientific ideas or concepts, or steps in technical procedures in a text, using language that pertains to time, sequence, and cause/effect.</p> <hr/> <p>NGSS: Science Performance Expectations (2013) NGSS: Grade 3</p> <hr/> <p>3.Weather and Climate Performance Expectations</p>	<ul style="list-style-type: none"> • Stages of water cycle • Natural resource • Climate • Weather • Temperature • Mass of an object • Volume of an object • Stages of matter - solid, liquid, gas • Density • Water vapor • Evaporation • Absorption • types of earth materials • waterwheel 	<p>The students will be able to:</p> <ul style="list-style-type: none"> • Investigate the properties of water • Compare the way water interacts with different surfaces • Explore how sponges interact with water • Use standard and metric units to measure temperature • Create a water thermometer/use a thermometer • Observe the properties of water as it is heated, cooled, and frozen • Compare the density of water at different temperatures • Observe, collect and compare weather data • Identify the difference between weather and climate • Discuss engineering methods to deal with weather related hazards • Compare what happens when water is poured through different earth materials • Construct a waterwheel and use it to lift objects

Unit	Standards	Content	Skills
	<p>3-ESS2-1. Represent data in tables and graphical displays to describe typical weather conditions expected during a particular season.</p> <p>3-ESS2-2. Obtain and combine information to describe climates in different regions of the world.</p> <p>3-ESS3-1. Make a claim about the merit of a design solution that reduces the impacts of a weather-related hazard.*</p> <p>© Copyright 2010. <p>Ecosystems (Life Science)</p>	<p>CCSS: ELA & Literacy in History/Social Studies, Science, & Technical Subjects K-5</p> <p>CCSS: Grade 3</p> <hr/> <p>Reading: Informational Text</p> <p>Key Ideas and Details</p> <p>1. Read closely to determine what the text says explicitly and to make logical inferences from it; cite specific textual evidence when writing or speaking to support conclusions drawn from the text.</p> <p>RI.3.1. Ask and answer questions to demonstrate understanding of a text, referring explicitly to the text as the basis for the answers.</p> <p>2. Determine central ideas or themes of a text and analyze their development; summarize the key supporting details and ideas.</p> <p>RI.3.2. Determine the main idea of a text; recount the key details and explain how they support the main idea.</p> <p>3. Analyze how and why individuals, events, and ideas develop and interact over the course of a text.</p>	<ul style="list-style-type: none"> • Germination of seeds • Organisms • Life cycle • Hydroponic garden • Parts of a plant • Process of photosynthesis • Crustacean • Habitat of animals • Adaptation • Food chain • Articulated human skeletal system • Muscle • Bone • Joints 	<p>The students will be able to:</p> <ul style="list-style-type: none"> • Conduct a seed hunt • Describe and compare seed properties • Examine and sort various seeds • Investigate the effect water has on seeds • Observe and record data over a period of time • Examine germinated seeds to determine similarities and difference • Set up a hydroponic garden and observe the life cycle of a bean plant • Compare the structure of a plant above ground and below ground • Observe and record the structures of a crustacean • Establish a feeding and maintenance schedule for a living organism

Unit	Standards	Content	Skills
	<p>RI.3.3. Describe the relationship between a series of historical events, scientific ideas or concepts, or steps in technical procedures in a text, using language that pertains to time, sequence, and cause/effect.</p> <p>NGSS: Science Performance Expectations (2013) NGSS: Grade 3</p> <hr/> <p>3.Interdependent Relationships in Ecosystems Performance Expectations</p> <p>3-LS2-1. Construct an argument that some animals form groups that help members survive.</p> <p>3-LS4-1. Analyze and interpret data from fossils to provide evidence of the organisms and the environments in which they lived long ago.</p> <p>3-LS4-3. Construct an argument with evidence that in a particular habitat some organisms can survive well, some survive less well, and some cannot survive at all.</p> <p>3-LS4-4. Make a claim about the merit of a solution to a problem caused when the environment changes and the types of plants and animals that live there may change.*</p> <p>3.Inheritance and Variation of Traits: Life Cycles and Traits Performance Expectations</p> <p>3-LS1-1. Develop models to describe that organisms have unique and diverse life cycles but all have in common birth, growth, reproduction, and death.</p> <p>3-LS3-1. Analyze and interpret data to provide evidence that plants and animals have traits inherited from</p>		<ul style="list-style-type: none"> • Investigate organism behaviors and map where it spends its time in a habitat • Describe adaptations of organisms in different environments • Observe the articulated human skeletal system in action • Explore joints and their role in movement • Build operational models of muscle-bone systems • Create and analyze fingerprint patterns • Analyze and interpret data from fossils to explain the relationship between organisms living today and in the past.

Unit	Standards	Content	Skills
	<p>parents and that variation of these traits exists in a group of similar organisms.</p> <p>3-LS3-2. Use evidence to support the explanation that traits can be influenced by the environment.</p> <p>3-LS4-2. Use evidence to construct an explanation for how the variations in characteristics among individuals of the same species may provide advantages in surviving, finding mates, and reproducing.</p> <p>© Copyright 2010. <p>Motion and Stability (Physical Science)</p>	<p>CCSS: ELA & Literacy in History/Social Studies, Science, & Technical Subjects K-5 CCSS: Grade 3</p> <hr/> <p>Reading: Informational Text Key Ideas and Details 1. Read closely to determine what the text says explicitly and to make logical inferences from it; cite specific textual evidence when writing or speaking to support conclusions drawn from the text.</p> <p>RI.3.1. Ask and answer questions to demonstrate understanding of a text, referring explicitly to the text as the basis for the answers.</p> <p>2. Determine central ideas or themes of a text and analyze their development; summarize the key supporting details and ideas.</p> <p>RI.3.2. Determine the main idea of a text; recount the key details and explain how they support the main idea.</p> <p>3. Analyze how and why individuals, events, and ideas develop and interact over the course of a text.</p>	<ul style="list-style-type: none"> • Force • Magnets (magnetic field) • Gravity • Motion of objects • Mixtures • States of matter - solid, liquid, gas • Solution • Balanced and unbalanced forces • Patterns of motion 	<p>The student will be able to:</p> <ul style="list-style-type: none"> • Predict and conduct an investigation to determine how far a magnetic field extends • Explore and identify patterns of motion • Design wheel and axle systems and test systems with ramps • Make twirly birds and explore variables that change motion • Design a cart that can meet a specific goal or solve a problem • Use metric tools to refine observations by measuring mass and volume • Create mixtures and solutions • Investigate simple chemical reactions • Engage in science and engineering practices to collect data and answer questions

Unit	Standards	Content	Skills
	<p>RI.3.3. Describe the relationship between a series of historical events, scientific ideas or concepts, or steps in technical procedures in a text, using language that pertains to time, sequence, and cause/effect.</p> <p>NGSS: Science Performance Expectations (2013) NGSS: Grade 3</p> <hr/> <p>3.Forces and Interactions Performance Expectations</p> <p>3-PS2-1. Plan and conduct an investigation to provide evidence of the effects of balanced and unbalanced forces on the motion of an object.</p> <p>3-PS2-2. Make observations and/or measurements of an object’s motion to provide evidence that a pattern can be used to predict future motion.</p> <p>3-PS2-3. Ask questions to determine cause and effect relationships of electric or magnetic interactions between two objects not in contact with each other.</p> <p>3-PS2-4. Define a simple design problem that can be solved by applying scientific ideas about magnets.*</p>		<ul style="list-style-type: none"> Organize and complete legible science journals
